Experienced Backend Web Developer with expertise in Django. Proficient in crafting efficient, secure, and scalable solutions. Collaborative team player with a track record of delivering high-quality projects. Strong problem-solving skills and a passion for staying updated with industry trends. Ready to contribute to innovative web development projects.

## Experience

### Backend developer

Nable Invent solution / 04/2023 - Present

In my recent role as a Backend Developer, I have Designed and implemented RESTful APIs, managed authentication and authorization mechanisms, and optimizing database performance. My commitment to optimization and staying current with industry trends enabled me to consistently deliver outstanding results within collaborative team settings.

### Backend Intern

M.N.S Education / 08/2022 - 10/2022

I applied my comprehensive expertise in Django and web development to create powerful server-side solutions. I excelled at translating intricate requirements into efficient, secure, and scalable code, contributing to seamless user experiences.

### PROJECTS

- Nable ESS : A comprehensive employee management application I developed, utilizing Django. Streamlined employee data, schedules, and tasks, enhancing efficiency and communication within the organization.
- Eqi5 : Horse Stable Management: Created a robust web platform using Django for streamlined management of horse stables. Effectively handled horse records, schedules, and facility maintenance, optimizing operations.
- Poppo : Restaurant Management WebApp Engineered a dynamic web application with Django to efficiently oversee restaurant operations. Enhanced order management, reservations, and menu updates, contributing to elevated customer experiences and business growth.
